

Do Prazer à Maternidade

— “Compreendendo a relação entre sexo e gravidez”

Integrantes: Paula Castro, Mariana, Isabela, Valeria,
Paulo Henrique.

Senac-RO

O que é sexo?

O que é sexo?

A atividade sexual é um conjunto de interações físicas e emocionais entre duas pessoas que envolvem estímulos sexuais. Isso pode incluir beijos, carícias, relação sexual, entre outras formas de intimidade. É uma expressão saudável e natural da sexualidade humana, mas é importante que seja praticada com consentimento, respeito mútuo e responsabilidade.

Consentimento sexual

Ambos devem expressar claramente sua vontade de participar, sem pressão, coerção ou manipulação. Por exemplo, se uma pessoa disser "sim" para uma atividade sexual, isso não significa automaticamente que ela está concordando com outras atividades ou que o consentimento é válido para sempre. O consentimento deve ser contínuo e pode ser retirado a qualquer momento.

exemplo: se um casal estiver envolvido em uma atividade íntima e um dos parceiros expressar desconforto ou pedir para parar, é crucial que o outro respeite essa decisão imediatamente. O consentimento não deve ser presumido e é fundamental garantir que todos os envolvidos se sintam seguros e confortáveis.

Saúde Sexual e Reprodutiva:

Saúde sexual: A saúde sexual e reprodutiva abrange diversos aspectos relacionados à saúde física, mental e emocional em relação à sexualidade e à reprodução. Isso inclui a prevenção de doenças sexualmente transmissíveis, o acesso a métodos contraceptivos, o planejamento familiar, a educação sexual, o apoio durante a gravidez e parto, entre outros.

A realização regular de exames para detectar doenças sexualmente transmissíveis, como o HIV, sífilis e hepatite. Isso ajuda na prevenção, diagnóstico precoce e tratamento adequado, é necessário o acesso a métodos contraceptivos para que as pessoas possam tomar decisões conscientes sobre sua vida reprodutiva. Isso inclui desde preservativos até métodos contraceptivos de longo prazo, permitindo que as pessoas escolham o que melhor se adequa às suas necessidades e circunstâncias.

Infecções Sexualmente Transmissíveis (IST)

são causadas por vírus, bactérias ou outros microrganismos, **existem diversos tipos de infecções sexualmente transmissíveis, mas os exemplos mais conhecidos são:**

- Herpes genital
- HPV
- Gonorreia e infecção por Clamídia
- Sífilis

Herpes Genital

Sintomas: coceira,
bolinhas, dor ao urinar,
febre

HPV

Verrugas genitais ou anais,
Coceira, desconforto ou
dor na área afetada

Clamidia Primária

Úlcera indolor (cancro) no local de infecção,
que pode ser nos órgãos genitais, ânus,
boca ou outras áreas do corpo.

Gonorreia e Clamídia

Dor ao urinar, Secreção espessa,
amarelada ou esverdeada que sai do pênis
ou da vagina, dor abdominal ou pélvica

Elas são transmitidas, por meio do contato sexual (oral, vaginal, anal) sem o uso de camisinha masculina ou feminina, com uma pessoa que esteja infectada. A transmissão de uma IST pode acontecer, ainda, da mãe para a criança durante a gestação, o parto ou a amamentação. De maneira menos comum, as IST também podem ser transmitidas por meio não sexual, pelo contato de mucosas ou pele não íntegra com secreções corporais contaminadas.

Metodos Contraceptivos:

Os métodos contraceptivos têm como objetivo prevenir a gravidez, permitindo que as pessoas possam ter controle sobre o momento de ter filhos. Eles funcionam de diferentes maneiras, seja impedindo a ovulação, tornando o útero um ambiente hostil para a implantação do óvulo fertilizado, ou evitando que o espermatozoide alcance o óvulo. Além disso, alguns métodos contraceptivos também ajudam a prevenir doenças sexualmente transmissíveis.

Sexual education basics

Contraception

Saturn is a gas giant and has several rings. It's composed of hydrogen

Reproduction

Neptune is the fourth-largest object by diameter in the Solar System

Pregnancy test methods

Blood test

Mercury is the smallest one in the Solar System. Its name has nothing to do with the liquid metal

Pregnancy test

Venus has a beautiful name and is the second planet from the Sun. It's hotter than Mercury

Ultrasound

Earth is the third planet from the Sun and the only one that harbors life in the Solar System

Contraception methods

Condoms

Venus has a beautiful name and is the second planet from the Sun

Birth control pills

Earth is the only one that harbors life in the Solar System

Planning

Despite being red, **Mars** is actually a cold place

Birth control injection

Jupiter is a gas giant and the biggest planet in the Solar System

Key concepts that you need to remember

Female

Mercury is the smallest planet of them all

In-vitro

Despite being red, **Mars** is actually a cold place

Gynecologist

Venus has a beautiful name and high temperatures

Spermatozoids

Jupiter is the biggest planet in the Solar System

Male

Earth is the only planet known to harbor life

Vagina

Saturn is not the only planet with rings

02

STDs

You can enter a **subtitle** here if you need it

Awesome words

A picture is worth a thousand words

4,498,300

Big numbers catch your **audience's** attention

333,000

Mercury is a small planet

386,000 km

Venus is a hot planet

9h 55m 23s

Earth is the planet with life

Condoms versus birth control pills

85%

Condoms

Jupiter is a gas giant and the
biggest planet in the Solar System

91%

Birth control pills

Saturn is the second-largest
planet in the Solar System

Computer mockup

Orientation

You can **describe the topic**
of the section here

Tablet mockup

You can replace the image on the screen with
your own work. Just right-click on it and select
"Replace image"

Countries that prioritize sexual health

Canada

The **Sun** is the star that all planets orbit

Australia

The **Moon** is Earth's only natural satellite

South Africa

Pluto is now seen as a dwarf planet

Learning the basics about sexual health

Sexual health important concepts

Topic	Information	Importance
Safe sex	Use of condoms and contraceptives	Prevents STDs and unplanned pregnancies effectively
Consent	Mutual agreement and boundaries	Crucial for ethical and legal sexual interactions
Regular check-ups	Sexual health screenings and tests	Early detection of infections and diseases
STD awareness	Knowledge of common sexually transmitted infections (STDs)	Prevention and timely treatment for emergencies

Sexual health through the years

35%
20XX
Mercury is the closest planet to the Sun

20%
20XX
Venus has extremely high temperatures

45%
20XX
Earth is the only planet that harbors life

Exercise 1: Matching the image

Instructions: Match the word with the **correct image** and add a brief definition

IUD

Write the definition

Blood test

Write the definition

Birth control pills

Write the definition

Exercise 2

Instructions: Write the **advantages** and **disadvantages** about the contraceptive methods shown in the table

	Advantages	Disadvantages
Birth control pills	Write something	Write something
Condom	Write something	Write something
Vasectomy	Write something	Write something
Vaginal ring	Write something	Write something

Exercise 3

Instructions: Erin is wondering about **what to do for her sexual health**, write an action for each icon and add a number to display the process

1

action

?

action

?

action

?

action

Exercise 4: Write your conclusions

Conclusion 1:

Write a **conclusion** here

Conclusion 2:

Write a **conclusion** here

Conclusion 3:

Write a **conclusion** here

Thanks!
